

Free, online workshops empowering teachers to encourage creativity in their students

Hi there!

We're a team of researchers from the [MIT Media Lab's Learning Initiative](#), and we're excited to invite you and your colleagues to a series of free online workshops for K-12 teachers on maker education:

- **What is Maker Education?** (Thursday, October 12, 2017 4-5:30pm EDT)
- **Culturally Relevant Pedagogy in Maker Education** (Thursday, November 16, 2017 4-5:30pm EDT)
- **Facilitating Maker Classrooms** (Thursday, January 11, 2018 4-5:30pm EDT)
- **Assessing Creative Learning Projects** (Thursday, February 8, 2018 4-5:30pm EDT)
- **The Future of Making and Learning** (Thursday, March 8, 2018 4-5:30pm EDT)

They'll be held online through our custom virtual conference center called Unhangout. These workshops are participant-driven, meaning that YOU and your fellow teacher participants will drive the conversation and lead the sessions. We think that a lot of valuable learning happens from our peers and colleagues, so we're hoping this format will support teacher learning, a sense of community with fellow teachers, and self-confidence as a creative educator.

All K-12 teachers are invited! If you teach shop, English, physics, or cooking, we believe you can learn from one another about infusing aspects of making into your teaching and encouraging creativity in your students.

If you attend all five workshops and complete a written reflection, you'll be awarded 10 Professional Development Points or 1 Continuing Education Credit (depending on what your employer recognizes), issued by MIT.

Interested? Learn more at [our website](#) or register for the workshops!
